

MISSION

The variety and quality of experiences during the first eight years of life provide the essential foundation for each child's future success. The purpose of this resource is to promote continuity of practice among families, educators, and community partners that leads to optimal conditions for learning.

GOAL

Professionals and stakeholders will understand and implement research-based, developmentally appropriate practices; ensuring alignment birth through third grade.

STAKEHOLDERS

Children, Families, Community Partners, District Administrators, Principals/Site Administrators, Teaching Teams, Child Care Providers, Service Providers, Higher Education.

BIRTH TO THIRD GRADE ALIGNMENT TARGET

Knowing about Child Development and Learning

Knowing What Is Individually Appropriate

Knowing What Is Culturally Appropriate

It is essential that the school, community, and families embrace the birth to third grade learning continuum that builds a strong foundation of supports for children with a deeper understanding of appropriate teaching practices to help children be engaged and successful learners.

Understanding what children know and can do, how they process information, solve problems, and how they interact with other children and adults, guides student learning and growth along the birth to third grade learning continuum.

Educators must accept the legitimacy of children's home language, respect (hold in high regard) the home culture, and promote and encourage the active involvement and support of all families, including extended and nontraditional family units. (NAEYC 1995, 2)

Example Implementation Indicators

Data Collection and Analysis Options

Evidence

Resources

1. Screening:

a. Developmental Screening

Each child is screened when entering a program by using procedures or instruments designed to identify those who may need further assessment or intervention. Children are assessed in hearing, vision, medical, cognitive, language, motor and/or social emotional development.

b. Universal Screening

A universal screener is an assessment tool that is used as the first step in determining whether students are on track for meeting future outcomes/goals or at-risk for learning problems (e.g. reading, math, behavior, writing). quick and efficient to administer and score and also provide valid and reliable information that test the critical skills they are designed to assess and they provide consistent information overtime because they test the same skills each time. The information obtained from the assessments is predictive of future student performance.

- Analysis of comprehensive screening results are used to identify if children are developmentally on track and may need a referral(ie. hearing, vision, medical, cognitive, speech and language, motor, social emotional).
- The universal screener allows data to be entered into a data management system in order to receive visual displays of the data for more efficient and effective data analysis.

- Completed screenings.
- Analysis of screen results, referral documents, and follow up where needed
- Screening is completed to benchmark skills 3-4 times per year.
- Implement tiered interventions to target specific skills.

<p>2. Intervene early by providing a multi-tiered model of instruction and intervention.</p> <p>Tier 1- Following the components of the PQA and approved research based curricula that are aligned with the Michigan Early Childhood Standards of Quality , classroom instruction will meet all of the learning needs of all learners.</p> <p>Tier 2- Classroom based individual or small group interventions for literacy, motor development and social/emotional skills for some learners.</p> <p>Tier 3- Targeted individualized interventions that may require further support from additional staff (ie. play therapy, sensory diet, behavior plan, speech therapy, behavioral intervention, occupational therapy, social/emotional support, etc.) for a few students.</p>	<ul style="list-style-type: none"> Data from each tier is disaggregated for analysis at the individual, classroom, site/subrecipient, and county level on an ongoing basis. Annually review all of the systems data to determine if the overall MTSS structure needs to change. 	<ul style="list-style-type: none"> Professional development calendar, coaching plan, and sign-in sheets documenting staff are trained to implement all 3 tiers of support with fidelity. Documentation of a high quality evaluation process exists that includes a professional growth model for each member of the teaching team. Staff evaluations document that staff demonstrate the skills and competencies to plan, differentiate and accommodate instruction to meet the needs of all students. Lesson plans showing differentiation based on child needs. Individualized instruction will be reflected in small group time. Data review teams meet regularly to evaluate the effectiveness of each tier in the MTSS model. A process exists to guide personnel in how students receive instruction and/or intervention in fluid a manner. Written documents that articulate the system of supports identified for all learners. Staff can clearly articulate the system of supports. A problem solving model is utilized to design and evaluate the effectiveness of instruction and intervention at each tier. (Z-Model, Hexagon Model). Student achievement data documents a unified system delivering effective instruction to ALL students. 	<ul style="list-style-type: none"> Pre-K Resources RTI Social/Emotional Rtl Framework PBIS World The Social and Emotional Outcomes Cross State Learning Network Center on the Social Emotional Foundations for Early Learning Technical Assistance Center on Social Emotional Intervention for Young Children The Colorado Center for Social Emotional Competence and Inclusion Program Quality Assessment (POA) Helping Children Cope with Traumatic Stress Manual Essential Instructional Practices in Early Literacy Conscious Discipline Rtl A Model for Rtl in Pre-K Missouri Positive Behavior Intervention Supports Center for Early Childhood Mental Health Consultation Resources on RTI in Early Childhood MDE MTSS What Works ClearingHouse RTI4 Success
